Nina Ashley de la Cruz

Sommario/riassunto

"In September 2014, the Global Forum on Innovation in Health Professional Education and the Forum on Public-Private Partnerships for Global Health and Safety of the Institute of Medicine convened a workshop on empowering women and strengthening health systems and services through investing in nursing and midwifery enterprise. Experts in women's empowerment, development, health systems' capacity building, social enterprise and finance, and nursing and midwifery explored the intersections between and among these domains. Innovative and promising models for more sustainable health care delivery that embed women's empowerment in their missions were examined. Participants also discussed uptake and scale; adaptation, translation, and replication; financing; and collaboration and partnership. Empowering Women and Strengthening Health Systems and Services Through Investing in Nursing and Midwifery Enterprise summarizes the presentations and discussion of the workshop. This report highlights examples and explores broad frameworks for existing and potential intersections of different sectors that could lead to better health and well-being of women around the world, and how lessons learned from these examples might be applied in the United States."-- Publisher's description.
