Sommario/riassunto	Islamic economics and finance have increased in importance over the last few decades, with new Islamic financial institutions opening up and a number of important books published on the topic. This glossary, fully updated and revised for the new edition, uses easy to understand language to introduce terms used by Muslim scholars, historians and legal experts. The book covers terms from Arabic, Urdu, Turkish, Malaysian and English sources whilst covering the Islamic side of such terms as taxation, banking, insurance, accounting, and auditing.
