Sirico -- Restoring sound economic thinking : what natural law taught us / John Mueller -- The idea of commerce in enlightenment political thought / Alan Levine -- Understanding Friedrich Engels (and Marx) and Adam Smith on economic organization and the price mechanism / Samuel Hollander -- Ten (mostly) Austrian insights for these trying times / Bruce Caldwell -- Political economy and American economic experience -- Promoting the general welfare : political economy for a free republic / Richard Wagner -- The economic theory of the American founding / Thomas G. West -- Hamilton and Jefferson: two visions of democratic capitalism / Peter McNamara -- The right kind of regulation: how the founders thought about regulation / Joseph Postell -- American banking from birth to bust, and all points in between / Larry Schweikart.
Sommario/riassunto	The recent economic crisis in the United States has highlighted a crisis of understanding. In this volume, Bradley C. S. Watson and Joseph Postell bring together some of America's most eminent thinkers on political economy-an increasingly overlooked field wherein political ideas and economic theories mutually inform each other. Only through a restoration of political economy can we reconnect economics to the

human good. Economics as a discipline deals with the production and distribution of goods and services. Yet the study of economics can indeed must-be employed in our striving for the best
