Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Frontmatter -- Contents -- Acknowledgments -- I. THE ELEMENTS -- II. SHADOW GEORGICS -- III. THE ELEMENTS -- Notes
Sommario/riassunto	Winner of the 2003 National Book Critics Circle Award in the category of poetry. In her long-awaited fourth book of poetry, Susan Stewart gives us a series of splendid, numinous poems about truths learned with the mind but set free through the senses. Modeled on the seventeenth-century practice of century forms, or books of one hundred pages, Columbarium expresses the bond between the living and the dead in voices of parent to child, lover to beloved, and mortal to the gods. The book arrives as a meditative gift from one of our most respected poet-critics. Stewart frames her Columbarium with four poems paying homage to the elements-to their destructive and creative aspects and to their roles in the human and more than human worlds. Both nest and crypt, the book's center holds an alphabet of "shadow georgics," poems of instruction and doubt that link knowledge and the unconscious. Questions of mortality, of goodness and suffering, and of the fragility and power of memory animate these poems. In one poem an apple calls the narrator back from the dead to savor the echoes of its varieties in myth and literature. In another, the seeds of a pear tree reveal the essential unity that makes the diversity of existence possible. Stewart's Columbarium is both a memorial to the dead and a testament to life.

2. Record Nr.	UNINA9910820442303321
Autore	Dietert Rodney R

Sommario/riassunto	""Strategies for Protecting Your Child's Immune System"" is the first book to focus on prevention of environmental damage to the immune system of embryos, babies and older children. It provides expecting and existing parents, their families and physicians with science-based information to protect and proactively manage their child's immune system. Environmental exposures (pollutants, allergens, drugs, diet, physical factors) in the home, school and community can damage the developing immune system and increase the risk of lifelong chronic diseases such as allergies, asthma, type 1 diabetes, ce
