Sommario/riassunto	Autoethnography is a method of research that involves describing and analyzing personal experiences in order to understand cultural experiences. The method challenges canonical ways of doing research and recognizes how personal experience influences the research process. Autoethnography acknowledges and accommodates subjectivity, emotionality, and the researcher's influence on research. In this book, the authors provide a historical and conceptual overview of autoethnography. They share their stories of coming to autoethnography and identify key concerns and considerations that led to the deve
