Sommario/riassunto   The book links the concept of intention to human action. It provides
                     answers to questions like: Why do we act intentionally? Which impact
                     do reasons and motives have on our decisions? Certain events are
                     identified as intentional actions when they are considered as being
                     rationalized by reasons. The linguistic description of such events
                     enables us to reveal the structure of intention. The mental and the
                     linguistic constitute irreducible ways of understanding events. Among
                     the topics discussed are intentionality, actions, the linguistic form to
                     talk about intentionality and actions, Brentano's view of intentionality,
                     the phenomenological approach to intention and Wittgenstein's

proposals. The contributions by Wolfgang Künne, Peter Simons, Christian Bermes, Kevin Mulligan, Severin Schroeder, António Marques, Margit Gaffal, Michel Le Du, Jesús Padilla Gálvez, Bernhard Obsieger and Amir Horowitz show that actions and decisions are guided by intentional considerations.
