Sommario/riassunto

Written by economists and policy analysts at Resources for the Future, a Washington, DC, think tank with a tradition for independent, objective research, this collection of twenty-five 'memos to the President' offers constructive policy options for the elected administration on critical challenges related to energy, the environment, and natural resources. Each contributor to *New Approaches on Energy and the Environment* was asked to address the question: 'Based on your research and knowledge, what policy recommendation would you like to make to the next U.S. president?' Writing in advance of t
