

1. Record Nr.	UNINA9910807205103321
Titolo	Energy efficiency : towards the end of demand growth // edited by Fereidoon P. Sioshansi, Menlo Energy Economics
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Elsevier/AP, 2013 Oxford : , : Academic Press, , 2013
ISBN	0-12-397887-4 1-299-16013-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xlv, 631 pages) : illustrations (some color), maps (some color)
Collana	Gale eBooks
Disciplina	333.79 333.7916
Soggetti	Energy conservation Energy consumption
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. End of demand growth is within reach -- pt. 2. The frustratingly slow evolution of energy efficiency -- pt. 3. Case studies of low-energy communities and projects -- pt. 4. Opportunities and remaining obstacles.
Sommario/riassunto	Energy Efficiency: Towards the End of Demand Growth is a detailed guide to new energy efficiency technologies and policy frameworks affecting the profitability of efficiency projects. The contributions drawn together by F.P. Sioshansi feature insights from recognized thought leaders, detailed examinations of evolving technologies, and practical case studies yielding best practices for project planners, implementers and financiers. This volume challenges the "more is better" paradigm in energy production, examining efficiency technologies and measurement across the supply chain.
