1. Record Nr.   UNINA9910807316903321

   Autore   Rao J. N. K. <1937->

   Titolo   Small area estimation / / J. N. K. Rao and Isabel Molina

   Pubbl/distr/stampa   Hoboken, New Jersey : , : Wiley, , 2015
   ©2015

   ISBN   1-118-73572-2
   1-118-73585-4
   1-118-73579-X

   Edizione   [Second edition.]

   Descrizione fisica   1 online resource (476 p.)

   Collana   Wiley Series in Survey Methodology

   Disciplina   519.5/2

   Soggetti   Small area statistics
   Sampling (Statistics)
   Estimation theory

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia   Includes bibliographical references and indexes.

   Nota di contenuto   Direct domain estimation -- Indirect domain estimation -- Small area models -- Empirical best linear unbiased prediction : theory -- EBLUP : basic area level model -- Basic unit level model -- EBLUP : extensions -- Empirical Bayes (EB) method -- Hierarchical Bayes (HB) method.

   Sommario/riassunto   Praise for the First Edition   "This pioneering work, in which Rao provides a comprehensive and up-to-date treatment of small area estimation, will become a classic...I believe that it has the potential to turn small area estimation...into a larger area of importance to both researchers and practitioners." - Journal of the American Statistical Association   Written by two experts in the field, Small Area Estimation, Second Edition provides a comprehensive and up-to-date account of the methods and theory of small area estimation (SAE), particularly indirect estimation based on explicit small
