Sommario/riassunto	The Favor of Friends offers the first book-length exploration of intercession—aid and advocacy by one individual or group in behalf of another—within early medieval aristocratic societies. Drawing upon a variety of disciplines and historiographical traditions, Sean Gilsdorf demonstrates how this process operated, and how it was ideologically elaborated, in Carolingian and Ottonian Europe, allowing individuals and groups to leverage their own, limited interpersonal networks to the

fullest, produce new relationships, gain access to previously closed spaces, and generate interest in their agendas from those able to effect change. The Favor of Friends enriches our understanding of early medieval politics and rulership, offering a model of political interaction in which hierarchy and comity do not stand in ideological and pragmatic tension, but instead work in integrated and mutually-reinforcing ways.
