

1. Record Nr.	UNINA9910807370603321
Titolo	Yiddish language structures // edited by Marion Aptroot, Bjorn Hansen
Pubbl/distr/stampa	Berlin ; ; Boston : , : De Gruyter Mouton, , [2014] ©2014
ISBN	3-11-033952-8
Descrizione fisica	1 online resource (306 p.)
Collana	Empirical approaches to language typology, , 0933-761X ; ; 52
Classificazione	GD 8201
Disciplina	439/.15
Soggetti	Yiddish language - Grammar Yiddish language - Usage Linguistic change
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Noun plurals in Israeli Hasidic Yiddish : a psycholinguistic perspective / Netta Abugov and Dorit Ravid (Tel Aviv) -- Language change in a bilingual community : the preposition far in Israeli Haredi Yiddish / Dalit Assouline (Haifa) -- The foundations of written Yiddish among Haredi Satmar Jews / Steffen Krogh (Arhus) -- The (original) unity of Western and Eastern Yiddish : an assessment based on morpho-syntactic phenomena / Jurg Fleischer (Marburg) -- Changes in the position of the finite verb in older Yiddish / Henrike Kuhnert (Jena/Cambridge) and Esther-Miriam Wagner (Jena) -- Yiddish modals, with special reference to their polyfunctionality and constructional properties / Bjorn Hansen (Regensburg) -- On negation, indefinites, and negative indefinites in Yiddish / Johan van der Auwera and Paul Gybels (Antwerp) -- On superordinate az-clauses in Yiddish narrative / Moshe Taube (Jerusalem) -- Aspects of Yiddish adjective formation : nasal suffixes creativity across a dual heritage / Simon Neuberg (Trier) -- Yiddish passive constructions : a case study based on the new Corpus of Modern Yiddish / Sandra Birzer (Regensburg).
Sommario/riassunto	Yiddish Language Structures presents ten new studies on structural aspects of Yiddish in the light of modern linguistic theories which are of interest to linguists and philologists. The contributions are examples of data-based research. They address several levels of the language

system including morphology, syntax and lexicology, and put special emphasis on mechanisms of internal and contact-induced language change spanning different epochs and societal and textual strata.
