Sommario/riassunto	This study explores the service-citizenship nexus in Nigeria, using the National Youth Service Corps (NYSC) programme as an empirical backdrop. It attempts to understand the relationship between civic service and citizenship on the one hand, and it examines the question as to whether youth service promotes a sense of citizenship and patriotism on the other. In the relevant studies on service and sociology, the assumption that service is antecedent to, and impacts positively on citizenship, is taken for granted. However, conclusions

from this study call for an urgent rethinking of this wisdom.
