

1. Record Nr.	UNINA9910807623003321
Titolo	Machine learning applications in software engineering [[electronic resource] /] / editors, Du Zhang, Jeffrey J.P. Tsai
Pubbl/distr/stampa	Hackensack, N.J. ; ; Hong Kong, : World Scientific, c2005
ISBN	1-281-37255-2 9786611372552 981-256-927-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (367 p.)
Collana	Series on software engineering and knowledge engineering ; ; v. 16
Altri autori (Persone)	ZhangDu TsaiJeffrey J.-P
Disciplina	006.31
Soggetti	Software engineering Computer software - Quality control Computer software - Evaluation Machine learning
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 345-355) and index.
Nota di contenuto	ACKNOWLEDGMENT; TABLE OF CONTENTS; Chapter 1 Introduction to Machine Learning and Software Engineering; Chapter 2 ML Applications in Prediction and Estimation; Chapter 3 ML Applications in Property and Model Discovery; Chapter 4 ML Applications in Transformation; Chapter 5 ML Applications in Generation and Synthesis; Chapter 6 ML Applications in Reuse; Chapter 7 ML Applications in Requirement Acquisition; Chapter 8 ML Applications in Management of Development Knowledge; Chapter 9 Guidelines and Conclusion; References
Sommario/riassunto	Machine learning deals with the issue of how to build computerprograms that improve their performance at some tasks throughexperience. Machine learning algorithms have proven to be of greatpractical value in a variety of application domains. Not surprisingly,the field of software engineering turns out to be a fertile groundwhere many software development and maintenance tasks could beformulated as learning problems and approached in terms of learningalgorithms.
