Appendix 5 The Population of Walled Poleis in Epeiros and Makedonia Appendix 6 Corvisier's Calculation of the Urban Population of Thessaly; Bibliography; Index of Sources; Index of Names
Sommario/riassunto	"Reflecting the innovative work of the Copenhagen Polis Centre's 2004 inventory of Archaic and Classical Greek city-states, Hansen's "shotgun method" for reconstructing and estimating the overall size and local distribution of the Greek population challenges the long-standing opinion that the majority of ancient Greeks lived a rural, subsistent life" --Provided by publisher.
