Sommario/riassunto

These 19 peer-reviewed papers cover emerging topics in Advanced Materials (e.g.: polymer composites, nanocomposites, ceramics, thin-film coatings and shape-memory alloys) and thus offer an unique insight into current progress. Review from Book News Inc.: Selected papers from a January 2011 conference held in Pakistan highlight the latest work in advanced materials areas such as polymer composites, thin film coatings, and shape memory alloys. Papers are grouped in sections on composites, nanocomposites, ceramics and oxides, and thin films and surface engineering. Some specific topics addressed
