Note generali	Description based upon print version of record.
Nota di contenuto	Cover; Title Page; Copyright; Contents; About the Authors; Series Foreword: Essentials of Forensic Science; Foreword; Preface; About the Companion Website; Chapter 1 Introduction; 1.1 Overview of contents; 1.2 A brief history of tool marks; 1.3 General aspects of marks' comparison; 1.4 Training requirements for examiners; 1.5 Good forensic practice; 1.6 Examination and comparison strategy; 1.6.1 Analysis; 1.6.2 Comparison; 1.6.3 Evaluation; 1.6.4 Verification; 1.7 Environment and equipment; 1.7.1 Basic requirements; 1.7.2 Examiner's 'toolbox'; 1.7.3 Test mark and casting materials 1.7.4 Larger equipment1.7.4.1 The comparator; 1.8 Quality assurance; 1.9 A brief summary; References; Chapter 2 Tool Manufacture; 2.1 Introduction; 2.2 Working with metal; 2.3 Creating a tool 'blank'; 2.3.1 Forging; 2.3.2 Blanking and shearing; 2.3.3 Metal cutting operations; 2.4 Finishing processes; 2.5 Wear, corrosion and damage; References;

Chapter 3 Scene Examination; 3.1 Examining and recording the scene; 3.2 General preliminaries; 3.2.1 Verifying the circumstances; 3.2.2 Recording the scene; 3.2.3 Scene to scene linking; 3.2.4 Packaging; 3.3 Forced entry marks-levering
3.3.1 Recovery of levering marks
3.4 Forced entry marks-other; 3.4.1 Hammer-type attack; 3.4.2 Gripping tool attacks; 3.4.3 Motor vehicle entry; 3.5 Entry by cutting; 3.5.1 Padlock removal; 3.5.2 Breached security systems; 3.6 Theft of metal; 3.7 Examination of machines; 3.8 Pathology samples; 3.9 Collecting suspect tools; References; Chapter 4 Initial Laboratory Examination; 4.1 General preliminaries; 4.1.1 Receiving items; 4.1.2 Planning the examination; 4.1.3 Preparing for the examination; 4.1.4 Collecting the items; 4.1.5 Decontamination of item packaging; 4.1.6 Operating procedures
4.1.7 Recording and opening the packaging
4.1.8 Description of the item; 4.1.9 Examination of the item; 4.2 Mainly impressed marks; 4.2.1 Levering marks; 4.2.2 Impact marks; 4.2.3 Gripping marks; 4.2.4 The tool(s); 4.3 Mainly dynamic marks; 4.3.1 Levering marks with striations; 4.3.2 Cutting and stabbing marks; 4.4 Saw marks; 4.5 Post-mortem samples; 4.6 Alphanumeric punches; 4.7 Using tool marks for intelligence purposes; 4.7.1 Type and size of tool; 4.7.2 Scene-to-scene linking without a tool; 4.7.3 Scene-to-scene linking using a tool recovered from a scene
4.7.4 Linking suspect's tool(s) to previously unsuspected scenes
4.7.5 Setting up a database; References; Chapter 5 Detailed Laboratory Examination; 5.1 First considerations; 5.2 Presentation of material to the comparator; 5.3 Impressed marks; 5.4 Marks with striations; 5.4.1 Sliding marks; 5.4.2 Double-bladed cutting tools; 5.4.3 Stab marks (in tyres and bones); 5.5 Saw marks; 5.5.1 Initial and final cuts; 5.5.2 Sawn ends; 5.6 Specialised marks; 5.6.1 Alphanumeric punches; 5.6.2 Drill marks; 5.6.3 Slide hammers; 5.6.4 Pipe cutters; 5.7 Other considerations; 5.7.1 Test marks made in situ
5.7.2 Amount of detail required for comparison

Sommario/riassunto

The Forensic Examination and Interpretation of Tool Marks brings together key techniques and developments in the field of tool marks in forensic science and explains clearly how tool mark analysis can be used within forensic investigation. The purpose of this book is to bring together as much of this information as possible in an accessible manner. The book deals with all aspects of tool mark evidence from crime scene to courtroom. The examination of a wide variety of different tool marks are discussed, including those made by specific tools such as saws and in complex m

Sommario/riassunto	<p>Long description: Im Laufe der letzten Jahrzehnte wurden verschiedene Pflegeorganisationsmodelle für die stationäre Pflege entwickelt. Bekannte Grundkonzepte sind die Funktionspflege, die Bereichspflege und die Bezugspflege bzw. Primary Nursing. Ergänzende Organisationskonzepte, die meist stationsübergreifend und teilweise berufsgruppenübergreifend gestaltet werden, sind z.B. Fall- bzw. Case Management, Entlassungsmanagement, Pflegeexperten. Die Entwicklung individueller Konzepte auf Basis dieser Grundmodelle hat in den letzten Jahren stark zugenommen. Hierbei setzt jede Einrichtung unterschiedliche Schwerpunkte. Innovativ sind Pflegesysteme mit dem Fokus auf den Patienten. In diesem Buch werden drei solche Pflegesysteme dargestellt und nach verschiedenen Aspekten evaluiert. Einmal geht es darum, welchen Nutzen Ärzte und Pflegekräfte in der Einführung der Bezugspflege sehen. Die zweite Evaluation prüft mit Hilfe des Instrumentes IzEP copyright, inwieweit das tatsächlich umgesetzte Pflegeorganisationssystem ein patientenorientiertes Organisationssystem ist. In der letzten Evaluation wird der Hauptfokus auf die Umsetzung des Expertenstandards Entlassungsmanagement durch die Einführung von Fallmanagern überprüft. Sowohl die Darstellung der entwickelten Konzepte als auch die</p>

Evaluationsergebnisse geben hilfreiche Impulse und Hinweise für die individuelle Gestaltung der Pflegeorganisation in stationären Einrichtungen.

Sommario/riassunto	As a creative entrepreneur, Edmund Siemens was one of the pioneers of petroleum trading in Germany. Later he succeeded as importer of Chilean nitre and built up his own fleet of ships. Finally he became a builder and landowner in the north of Hamburg. However, Edmund Siemens became really famous for his two large foundations: in 1896 Edmundsthal-Siemerswalde in Geesthacht, one of the first pulmonary treatment centres in Germany, and in 1907 the lecture building on the Moorweide, still a symbol of "the University" in Hamburg. Edmund Siemens' life is equally linked to the Hamburg, German and Transatlantic economic history of the 19th and early 20th centuries. He embodies a donor from Hamburg's upper middle classes in an ideal-typical manner. This is the first biography of "Hamburg's Carnegie", who also appeared as a donor and member of the board of trustees of the Hamburg Scientific Foundation.
