

1.	Record Nr.	UNISALENTO991000596789707536
	Autore	Prescott, William Hickling
	Titolo	History of the conquest of Peru : with a preliminary view of the civilization of the Incas / by William H. Prescott
	Pubbl/distr/stampa	London : R. Bentley, 1854
	Edizione	[7. ed., revised]
	Descrizione fisica	XIX, 464 p. ; 19 cm.
	Disciplina	985.02
	Soggetti	Perù Conquista spagnola
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Ex libris: Rafael Montealegre
2.	Record Nr.	UNINA9910807742203321
	Autore	Bernevig B. Andrei <1978->
	Titolo	Topological insulators and topological superconductors / / B. Andrei Bernevig with Taylor L. Hughes
	Pubbl/distr/stampa	Princeton, New Jersey ; ; Oxford, [England] : , : Princeton University Press, , 2013 ©2013
	ISBN	1-4008-4673-0
	Edizione	[Course Book]
	Descrizione fisica	1 online resource (260 p.)
	Classificazione	UP 2200
	Disciplina	530.41
	Soggetti	Energy-band theory of solids Superconductivity Solid state physics - Mathematics Superconductors - Mathematics
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.

Nota di bibliografia

Includes bibliographical references and index.

Nota di contenuto

Front matter -- Contents -- 1. Introduction -- 2. Berry Phase -- 3. Hall Conductance and Chern Numbers -- 4. Time-Reversal Symmetry -- 5. Magnetic Field on the Square Lattice -- 6. Hall Conductance and Edge Modes: The Bulk-Edge Correspondence -- 7. Graphene -- 8. Simple Models for the Chern Insulator -- 9. Time-Reversal-Invariant Topological Insulators -- 10. Z<sub>2</sub> Invariants -- 11. Crossings in Different Dimensions -- 12. Time-Reversal Topological Insulators with Inversion Symmetry -- 13. Quantum Hall Effect and Chern Insulators in Higher Dimensions -- 14. Dimensional Reduction of 4-D Chern Insulators to 3-D Time-Reversal Insulators -- 15. Experimental Consequences of the Z<sub>2</sub> Topological Invariant -- 16. Topological Superconductors in One and Two Dimensions / Hughes, Taylor L. -- 17. Time-Reversal-Invariant Topological Superconductors / Hughes, Taylor L. -- 18. Superconductivity and Magnetism in Proximity to Topological Insulator Surfaces / Hughes, Taylor L. -- APPENDIX -- 3-D Topological Insulator in a Magnetic Field -- References -- Index

Sommario/riassunto

This graduate-level textbook is the first pedagogical synthesis of the field of topological insulators and superconductors, one of the most exciting areas of research in condensed matter physics. Presenting the latest developments, while providing all the calculations necessary for a self-contained and complete description of the discipline, it is ideal for graduate students and researchers preparing to work in this area, and it will be an essential reference both within and outside the classroom. The book begins with simple concepts such as Berry phases, Dirac fermions, Hall conductance and its link to topology, and the Hofstadter problem of lattice electrons in a magnetic field. It moves on to explain topological phases of matter such as Chern insulators, two- and three-dimensional topological insulators, and Majorana p-wave wires. Additionally, the book covers zero modes on vortices in topological superconductors, time-reversal topological superconductors, and topological responses/field theory and topological indices. The book also analyzes recent topics in condensed matter theory and concludes by surveying active subfields of research such as insulators with point-group symmetries and the stability of topological semimetals. Problems at the end of each chapter offer opportunities to test knowledge and engage with frontier research issues. Topological Insulators and Topological Superconductors will provide graduate students and researchers with the physical understanding and mathematical tools needed to embark on research in this rapidly evolving field.
