	Pubbl/distr/stampa	Romania : Editura Academiei, 1978
	Locazione	MA1
	Collocazione	7-L-14
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910830971803321
	Titolo	Clinical atlas of retreatment in endodontics / / edited by Viresh Chopra
	Pubbl/distr/stampa	Hoboken, NJ : , : John Wiley & Sons, Inc., , [2021] ©2021
	ISBN	1-119-50921-1 1-119-50918-1 1-119-50922-X
	Descrizione fisica	1 online resource (388 pages)
	Disciplina	617.6342059
	Soggetti	Dental pulp cavity - Treatment Endodontics Atlas Case Reports
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	Clinical Case 1, Perforation repair : A case of repair of pulpal floor perforation caused due to excessive cutting of floor of the pulp chamber / Moh'd Hammo -- Clinical Case 2, Instrument separation : A

case of surgical removal of a fractured instrument / Abhinay Agarwal -- Clinical Case 3, Ledge and Separated Instrument : A Case Of Retreatment / Garima Poddar -- Clinical Case 4, Instrument retrieval : A case of fractured instrument at apical third of mandibular molar / Jojo Kottoor -- Clinical Case 5, Perforation repair with Instrument retrieval : Management of multiple Endodontic mishaps / Padmanabh Jha -- Clinical Case 6, Strip perforation with Instrument retrieval : Clinical management / Zaher Al Taqi -- Clinical Case 7, Management of root canal treatment failure case with missed lateral canal anatomy and inadequate obturation / Chaniotis Antonis -- Clinical Case 8, Management of a case with faulty cast post and asymptomatic lateral periodontitis / Chaniotis Antonis -- Clinical Case 9, Management of a case with endo-perio lesion following a previous root canal treatment / Chaniotis Antonis -- Clinical Case 10, Management of a failed root canal treatment with silver cone obturation and fractured instrument / Chaniotis Antonis -- Clinical Case 11, Selective root canal treatment approach : Management of a failed root canal treated maxillary molar with selective root treatment / Gergely Benyocs -- Clinical Case 12, Guided endodontics and its application for non-surgical retreatments : Retreatment of a Maxillary anterior tooth using static guidance for non-surgical retreatment / Gergely Benyocs -- Clinical Case 13, Management of pulpal floor perforation with periapical lesion in the mesial root / Zaher Al Taqi -- Clinical Case 14, Management of root canal treatment failure case with missed canal anatomy and inadequate obturation / Eugen Buga -- Clinical Case 15, Multiple Endodontic mishaps : Management of root canal treatment failure case with inadequate obturation, hidden fractured instrument, ledge formation in a severely curved mandibular molar / Eugen Buga -- Clinical Case 16, Management of root canal treatment case with an instrument fracture in a mandibular molar / Viresh Chopra -- Clinical Case 17, Management of a mandibular molar with fractured Instrument extending in the periapical area / Zaher Al Taqi -- Clinical Case 18, Management of root canal treatment failure case with inadequate obturation and apically calcified canals / Viresh Chopra -- Clinical Case 19, Management of root canal treatment failure case with inadequate obturation and missed canals / Viresh Chopra -- Clinical Case 20, Management of root canal treatment failure case with inadequate obturation, unusual distal root anatomy, and suspected ledge formation in a mandibular molar / Eugen Buga -- Clinical Case 21, Management of root canal treatment failure case with inadequate obturation and faulty post placement / Viresh Chopra -- Clinical Case 22, Management of root canal treatment failure case with inadequate obturation, multiple perforations, fractured instrument and ledge formation in maxillary right first molar / Viresh Chopra -- Clinical Case 23, Management of root canal treatment failure case with inadequate obturation, fractured instrument and periapical lesion in mandibular left first molar / Viresh Chopra -- Clinical Case 24, Retreatment of an anterior tooth/ Garima Poddar -- Clinical Case 25, Nonsurgical Vs Surgical Retreatment : Decision Making / Meetu Ralli Kohli and Bekir Karabucak.

Sommario/riassunto

"Explore a comprehensive pictorial guide to the retreatment of root canals and failed endodontic cases with step-by-step advice on retreatment management Clinical Atlas of Retreatment in Endodontics delivers an image-based reference to the management of failed root canal cases. It provides evidence-based strategies and detailed clinical explanations to manage and retreat previous endodontically failed cases. It contains concrete evidence-based and practical techniques accompanied by full-colour, self-explanatory clinical photographs

taking the reader through a journey of successful management of the failed clinical cases. Using a variety of clinical cases, the book demonstrates why and how endodontic failures occur, how to prevent them, and how to manage them in clinical practice. It also emphasises on evaluating the restorability and prognosis of the tooth in order to make a proper case selection for providing retreatment. This book also discusses the various factors that can help the clinician to make a case for nonsurgical or surgical retreatment. Readers will benefit from the inclusion of clinical cases that provide: A thorough introduction to perforation repair, with a clinical case that includes the repair of pulpal floor perforation caused due to excessive cutting of the floor of the pulp chamber. An explanation of various factors for instrument separation, supported with a case that includes the removal of a fractured instrument. Practical discussions of instrument retrieval, with a case that includes a fractured instrument at the apical third of mandibular molar. A step wise pictorial description for guided root canal therapy. Selective root canal treatment as a treatment option for retreatment of failed endodontic cases. A detailed clinical cription for how to explore and modify the endodontic access cavity for locating extra/missed canals Perfect for endodontists, endodontic residents, and general dentists, Clinical Atlas of Retreatment in Endodontics is also useful for undergraduate dental students and private practitioners who wish to improve their understanding of endodontic retreatment and are looking for a one-stop reference on the subject"--

Sommario/riassunto	<p>"In recent years, patients' out-of-pocket costs for cancer care have been rising rapidly. These costs include health insurance deductibles, coinsurance, and copayments for covered services, as well as services that are not covered by insurance. Many cancer patients are especially vulnerable financially because their illness and/or treatment impedes their ability to work, with some patients losing employment altogether. Even with insurance, cancer patients often experience financial hardships, such as going into debt, depleting all assets to pay for cancer treatment, and personal bankruptcy. Although many elements contribute to the cost of cancer care, one important component is the cost of new cancer drugs, which has been escalating rapidly in recent years. To explore the issue of cancer drug costs and patient access to affordable, appropriate drug therapies, the Institute of Medicine's National Cancer Policy Forum convened a workshop on ensuring patient access to affordable cancer drugs in June 2014. Affordability was considered from both individual and societal perspectives. The workshop featured discussion panels as well as invited presentations from clinicians, researchers, representatives from the health insurance</p>

and pharmaceutical industries, and patient advocates. Ensuring Patient Access to Affordable Cancer Drugs summarizes the presentation and discussion of the workshop."--
