

1. Record Nr.	UNINA9910807755203321
Autore	Knorr-Cetina K (Karin)
Titolo	The manufacture of knowledge : an essay on the constructivist and contextual nature of science // Karin D. Knorr-Cetina ; preface by Rom Harre
Pubbl/distr/stampa	Oxford, England ; ; Elmsford, New York : , : Pergamon Press, , 1981 ©1981
ISBN	1-4832-8574-X
Edizione	[First edition.]
Descrizione fisica	1 online resource (204 p.)
Collana	Pergamon International Library of Science, Technology, Engineering, and Social Studies
Disciplina	306.45
Soggetti	Science - Methodology Knowledge, Theory of
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; The Manufacture of Knowledge: An Essay on the Constructivist and Contextual Nature of Science; Copyright Page; Preface; Acknowledgements; Table of Contents; Chapter 1. The Scientist as a Practical Reasoner: Introduction to a Constructivist and Contextual Theory of Knowledge; 1.1 Facts and Fabrications; 1.2 The Constructivist Interpretation I: Nature and the Laboratory; 1.3 The Constructivist Interpretation II: The ""Decision Ladenness"" of Fact-Fabrication; 1.4 The Laboratory: Context of Discovery or Context of Validation?; 1.5 The Contextuality of Laboratory Construction 1.6 Contextual Contingency as a Principle of Change1.7 The Constructivist Interpretation III: Innovation and Selection; 1.8 Sources of Reconstruction: The Internal and the External; 1.9 Sensitive and Frigid Methodologies; 1.10 From the Question Why to the Question How; 1.11 The Scientist as a Practical Reasoner; 1.12 The Cognitive and the Practical Reasoner; 1.13 Data and Presentation; Notes; Chapter 2. The Scientist as an Indexical Reasoner: The Contextuality and the Opportunism of Research; 2.1 Bringing Space and Time Back In: The Indexical Logic and the Opportunism of Research 2.2 Local Idiosyncrasies2.3 Occasioned Selections and the Oscillation of Decision Criteria; 2.4 The Neglected Research Site: Organisation vs.

Laboratory Situation; 2.5 Variable Rules, and Power; 2.6 Conclusion; Notes; Chapter 3. The Scientist as an Analogical Reasoner: A Principle of Orientation and a Critique of the Metaphor Theory of Innovation; 3.1 The Metaphor Theory of Innovation; 3.2 The Scientists' Accounts of Innovation; 3.3 Analogy Relations and the Opportunistic Logic of Research; 3.4 The Opportunism and the Conservatism of Analogical Reasoning
3.5 Ethnotheories of Innovation, or the Assumptions Behind Accounts of Innovation
3.6 A Metaphor- or Analogy-Theory of Failure and Mistake; 3.7 Conclusion; Notes; Chapter 4. The Scientist as a Socially Situated Reasoner: From Scientific Communities to Transscientific Fields; 4.1 The Scientific Community as a Unit of Contextual Organisation; 4.2 Quasi-Economic Models: From Community Gift-Giving to Community Capitalism; 4.3 The Scientist as an Economic Reasoner or 'Who are the Entrepreneurs?'; 4.4 The Labour Interpretation; 4.5 Variable Transscientific Fields; 4.6 Resource-Relationships
4.7 Resource-Relationships: Ultrafragile and Grounded in Conflict
4.8 The Transscientific Connection of Research; 4.9 Indeterminacy and the Transscientific Connection of Research; Notes; Chapter 5. The Scientist as a Literary Reasoner, Or the Transformation of Laboratory Reason; 5.1 The "Products" of Research; 5.2 The Grounding of a Research Effort in the Laboratory; 5.3 The Grounding of a Research Effort in the Scientific Paper; 5.4 First and Final Versions: The Dissimulation of Literary Intention; 5.5 The Construction of a Web of Reason; 5.6 The Management of Relevance
5.7 The Story of the Laboratory Continued

Sommario/riassunto

The anthropological approach is the central focus of this study. Laboratories are looked upon with the innocent eye of the traveller in exotic lands, and the societies found in these places are observed with the objective yet compassionate eye of the visitor from a quite other cultural milieu. There are many surprises that await us if we enter a laboratory in this frame of mind... This study is a realistic enterprise, an attempt to truly represent the social order of life in laboratories and institutes of research, just as they are. By bringing the philosophical issues to the surface as matter
