Record Nr. Titolo	UNINA9910807819803321 Circles disturbed : the interplay of mathematics and narrative / / edited
Pubbl/distr/stampa	by Apostolos Doxiadis and Barry Mazur Princeton, : Princeton University Press, c2012
ISBN	1-283-45704-0 9786613457042 1-4008-4268-9
Edizione	[Core Textbook]
Descrizione fisica	1 online resource (593 p.)
Altri autori (Persone)	DoxiadesApostolos K. <1953-> MazurBarry
Disciplina	510.1/4
Soggetti	Mathematics - Language Communication in mathematics Mathematics - History
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Frontmatter Contents Introduction Chapter 1. From Voyagers to Martyrs / Alexander, Amir Chapter 2. Structure of Crystal, Bucket of Dust / Galison, Peter Chapter 3. Deductive Narrative and the Epistemological Function of Belief in Mathematics / Nave, Federicala Chapter 4. Hilbert on Theology and Its Discontents / Mclarty, Colin Chapter 5. Do Androids Prove Theorems in Their Sleep? / Harris, Michael Chapter 6. Visions, Dreams, and Mathematics / Mazur, Barry Chapter 7. Vividness in Mathematics and Narrative / Gowers, Timothy Chapter 8. Mathematics and Narrative / Teissier, Bernard Chapter 9. Narrative and the Rationality of Mathematical Practice / Corfield, David Chapter 10. A Streetcar Named (among Other Things) Proof / Doxiadis, Apostolos Chapter 11. Mathematics and Narrative: An Aristotelian Perspective / Lloyd, G . E . R Chapter 12. Adventures of the Diagonal: Non-Euclidean Mathematics and Narrative / Plotnitsky, Arkady Chapter 13. Formal Models in Narrative Analysis / Herman, David Chapter 14. Mathematics and Narrative: A Narratological Perspective / Margolin, Uri Chapter 15. Tales of Contingency, Contingencies of Telling / Meister, Jan Christoph

1.

history, mathem great G soldier radically concrete abstract of these and the bustle o totally d book un way in v underst of "myth mathem	Disturbed brings together important thinkers in mathematics, and philosophy to explore the relationship between natics and narrative. The book's title recalls the last words of the reek mathematician Archimedes before he was slain by a Roman "Don't disturb my circles"words that seem to refer to two different concerns: that of the practical person living in the e world of reality, and that of the theoretician lost in a world of tion. Stories and theorems are, in a sense, the natural languages two worldsstories representing the way we act and interact, orems giving us pure thought, distilled from the hustle and f reality. Yet, though the voices of stories and theorems seem ifferent, they share profound connections and similarities. A
way we the edite Galison Nave, G	like any other, Circles Disturbed delves into topics such as the which historical and biographical narratives shape our anding of mathematics and mathematicians, the development as of origins" in mathematics, the structure and importance of natical dreams, the role of storytelling in the formation of natical intuitions, the ways mathematics helps us organize the think about narrative structure, and much more. In addition to ors, the contributors are Amir Alexander, David Corfield, Peter , Timothy Gowers, Michael Harris, David Herman, Federica La B.E.R. Lloyd, Uri Margolin, Colin McLarty, Jan Christoph Meister, Plotnitsky, and Bernard Teissier.
