

1. Record Nr.	UNINA9910807827003321
Autore	Foster Claire <1964->
Titolo	The ethics of medical research on humans // Claire Foster
Pubbl/distr/stampa	New York, : Cambridge University Press, 2001
ISBN	1-107-11634-1 1-280-15369-5 9786610153695 0-511-11734-5 0-511-01800-2 0-511-15458-5 0-511-30369-6 0-511-54549-5 0-511-05167-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xiii, 159 pages) : digital, PDF file(s)
Disciplina	174/.28
Soggetti	Human experimentation in medicine - Moral and ethical aspects Medicine - Research - Moral and ethical aspects Medical ethics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 147-153) and index.
Nota di contenuto	Cover; Half-title; Title; Copyright; Dedication; Contents; Foreword; Acknowledgements; 1 An introduction to the ethical issues; 2 Goal-based morality: scientific rigour in research; 3 Duty-based morality: acting in the research subjects' best interests; 4 Right-based morality: respecting the autonomy of research participants; 5 From principles to practice; 6 Case studies of goal-based issues; 7 Case studies of duty-based issues; 8 Case studies of right-based issues; 9 A framework for ethical review: researchers, research ethics committees, and moral responsibility; References; Index
Sommario/riassunto	One of the most difficult problems that confronts clinicians and medical professionals is how to apply ethical principles to real decisions affecting patients. In this even-handed book, Foster examines the three main approaches to moral decision-making: goal-

based, duty-based and rights-based. She examines the underlying philosophical arguments behind each, their relative strengths and weaknesses, and how they can actually be applied. She also looks at the problematic boundaries where best practice ends and experimentation begins. Is it ethical to experiment with new cures on people who are probably dying anyway? And how do you assess quality of consent? This book provides a thorough, non-partisan grounding in what the ethical principles are and what informs them. It is an invaluable preparation both for a researcher being interviewed by an ethics committee and for the people sitting on the committee, and will be essential reading for all medical decision-makers.
