

1. Record Nr.	UNINA9910807850103321
Titolo	Promoting cardiovascular health in the developing world [[electronic resource] ] : a critical challenge to achieve global health / / Committee on Preventing the Global Epidemic of Cardiovascular Disease: Meeting the Challenges in Developing Countries, Board on Global Health, Valentin Fuster and Bridget B. Kelly, editors ; Institute of Medicine of the National Academies
Pubbl/distr/stampa	Washington, : National Academies Press, 2010
ISBN	0-309-15761-7 1-282-78728-4 9786612787287 0-309-14775-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (483 p.)
Altri autori (Persone)	FusterValentin KellyBridget B
Disciplina	616.105
Soggetti	Cardiovascular system - Diseases - Prevention Health promotion - Developing countries Developing countries Health promotion services
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Reviewers""; ""Preface""; ""Acknowledgments""; ""Contents""; ""Summary""; ""1 Introduction""; ""2 Epidemiology of Cardiovascular Disease""; ""3 Development and Cardiovascular Disease""; ""4 Measurement and Evaluation""; ""5 Reducing the Burden of Cardiovascular Disease: Intervention Approaches""; ""6 Cardiovascular Health Promotion Early in Life""; ""7 Making Choices to Reduce the Burden of Cardiovascular Disease""; ""8 Framework for Action""; ""Appendix A: Statement of Task""; ""Appendix B: Committee and Staff Biographies""; ""Appendix C: Public Session Agendas"" ""Appendix D: Acronyms and Abbreviations"" ""Appendix E: World Bank Income Classifications July 2009""
Sommario/riassunto	"Cardiovascular disease (CVD), once thought to be confined primarily to industrialized nations, has emerged as a major health threat in

developing countries. Cardiovascular disease now accounts for nearly 30 percent of deaths in low and middle income countries each year, and is accompanied by significant economic repercussions. Yet most governments, global health institutions, and development agencies have largely overlooked CVD as they have invested in health in developing countries. Recognizing the gap between the compelling evidence of the global CVD burden and the investment needed to prevent and control CVD, the National Heart, Lung, and Blood Institute (NHLBI) turned to the IOM for advice on how to catalyze change. In this report, the IOM recommends that the NHLBI, development agencies, nongovernmental organizations, and governments work toward two essential goals: creating environments that promote heart healthy lifestyle choices and help reduce the risk of chronic diseases; and building public health infrastructure and health systems with the capacity to implement programs that will effectively detect and reduce risk and manage CVD. To meet these goals, the IOM recommends several steps, including improving cooperation and collaboration; implementing effective and feasible strategies; and informing efforts through research and health surveillance. Without better efforts to promote cardiovascular health, global health as a whole will be undermined."--home page.
