

1. Record Nr.	UNINA9910786218603321
Titolo	Innovation : essentials from leader to leader
Pubbl/distr/stampa	[Place of publication not identified] : , : [Jossey-Bass], , [2013] [2013]
ISBN	1-118-58708-1
Edizione	[1st edition]
Descrizione fisica	1 online resource (147 p.)
Collana	J-B Single Issue Leader to Leader
Disciplina	658.4
Soggetti	Business enterprises - Technological innovations Creative ability in business - Management
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Cover; Introduction; Breaking Away: A New Model for Innovation; Re-Imagining Innovation; The Four-Level Innovation Model; Risk and the Four Levels; The Three Ws; From Theory to Practice: The Leadership Imperative; The Time Has Come for Business Model Innovation; Making Business Model Innovation Systematic and Manageable; Responding to Threats; Capitalizing on Opportunities; Focus on Where the World Is Going; Flat, Spiky, and Curved is Now Open; The Changing World of Training and Development; The Open Learning World; Informal Learning; Supporting This Open Learning World; New Learning Vistas Leading in the Innovation ZoneCreating an Innovation Zone; Innovation 2.0: Sorting Your Ideas' Ambitions; Taking Ideas from Concept to Reality; Finding Innovation at the Intersection; Finding New Connections; Finding New Combinations at Work; How Diversity Drives Innovation; Standing at the Intersection; Assessing Your Organization's Innovation Capabilities; An Organizational Capabilities Framework; The Capabilities to Address Sustaining or Disruptive Technologies; Creating Capabilities to Cope with Change; A Structural Framework for Managing Different Types of Innovation The Danger of Wishful ThinkingInnovation Means Relying on Everyone's Creativity; Meaning Engages Our Creativity; Depend on Diversity; Involve Everybody Who Cares; Diversity Is the Path to Unity; People Will Always Surprise Us; Rely on Human Goodness; Sowing the Seeds of Innovation; Awareness; Partnering; Possibilities for Turning Necessity

into Opportunity; Perspective; Practicing Innovation at All Levels of the Company; Successful Innovation Through Artful Process; Making the Business-Arts Connection; Managing Artfully; Innovation: The New Route to New Wealth; The Innovation Imperative  
 You're Never Too Old to Innovate  
 Three Signs; Creating an Innovation Engine; From Ideas to Action; Hammer Time

#### Sommario/riassunto

Innovation is necessary for creating a bright, competitive future. In this collection, you'll find important insights on innovation drawn from the pages of the award-winning publication *Leader to Leader*. Written by some of the country's top thought leaders, including Clayton M. Christensen, Margaret J. Wheatley, and Gary Hamel, this collection makes innovation come alive in new and surprising ways. Focusing on different aspects and approaches of innovation, it delivers practical knowledge and advice that can mean the difference in your innovation efforts. Each article is packed with

#### Livello bibliografico

Monografia

#### Note generali

Description based upon print version of record.

#### Nota di bibliografia

Includes bibliographical references and index.

#### Nota di contenuto

The basis of architecturally exposed steel -- The category system -- Characteristics -- Erection considerations -- Coatings & protection --

Member choices -- Connections -- Specialized connections -- Custom fabrication.

---

## Sommario/riassunto

Freiliegende Stahlkonstruktionen kommen heute dank Fortschritten in der Brandschutztechnik auch bei anspruchsvollsten Bauaufgaben zum Einsatz. Deutschland, Österreich und die Schweiz können hierin von den jahrzehntelangen Erfahrungen profitieren, die insbesondere in Nordamerika und Großbritannien seit Aufkommen der High-Tech-Architektur und deren Weiterentwicklung hin zum Architecturally Exposed Structural Steel gereift sind. Eine der weltweit besten Kennerinnen dieser Bautechnik und ihrer Potenziale für avancierte Architektur legt in diesem Buch dar, wie sich die hohen Qualitätsanforderungen insbesondere an die Detaillierung und das Finish mit einer kostensparenden Differenzierung vereinen lassen: je nach Bauaufgabe, aber auch nach unterschiedlicher visueller Exponiertheit der Teile sowie durch ein geschicktes Zusammenspiel mit der Entwurfsidee. Alle dargestellten Lösungen werden anschaulich und faszinierend mit Abbildungen aus dem umfangreichen Fotoarchiv der Autorin dargestellt. Kostengünstige hohe Qualität in der anspruchsvollen Stahlarchitektur ist möglich - dank des hier dargestellten systematischen Umgangs mit diesen Fragen, wie er im angloamerikanischen Raum seit langem praktiziert wird.

This book provides the means for a better control and purposeful consideration of the design of Architecturally Exposed Structural Steel (AESS). It deploys a detailed categorization of AESS and its uses according to design context, building typology and visual exposure. In a rare combination, this approach makes high quality benchmarks compatible with economies in terms of material use, fabrication methods, workforce and cost. Building with exposed steel has become more and more popular worldwide, also as advances in fire safety technology have permitted its use for building tasks under stringent fire regulations. On her background of long standing as a teacher in architectural steel design affiliated with many institutions, the author ranks among the world's best scholars on this topic. Among the fields covered by the extensive approach of this book are the characteristics of the various categories of AESS, the interrelatedness of design, fabrication and erection of the steel structures, issues of coating and protection (including corrosion and fire protection), special materials like weathering steel and stainless steel, the member choices and a connection design checklist. The description draws on many international examples from advanced contemporary architecture, all visited and photographed by the author, among which figure buildings like the Amgen Helix Bridge in Seattle, the Shard Observation Level in London, the New York Times Building and the Arganquela Footbridge.
