Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The legal context -- Forensic mental health concepts -- Empirical foundations and limits -- Application -- Preparation for the evaluation -- Data collection -- Interpretation -- Report writing and testimony.
Sommario/riassunto	Forensic mental health assessment (FMHA) has grown into a specialisation informed by research and professional guidelines. This series presents up-to-date information on the most important and frequently conducted forms of FMHA. The 19 volumes address best approaches to practice for particular types of evaluation in the criminal, civil, and juvenile/family areas. Each volume contains a discussion of the relevant legal and psychological concepts, followed by a step-by-step description of the assessment process from preparing for the evaluation to writing the report and testifying in court.
