

1. Record Nr.	UNINA9910807971503321
Titolo	Handbook of metathesis . Volume 3 Polymer synthesis // edited by Robert H. Grubbs and Ezat Khosravi
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , 2015 ©2015
ISBN	3-527-69405-6 3-527-69407-2
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (424 p.)
Disciplina	547.412
Soggetti	Polymerization Metathesis (Chemistry)
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	Cover; Contents; Preface; List of Contributors; Chapter 1 Synthesis of Homopolymers and Copolymers; 1.1 Introduction; 1.2 Initiators; 1.3 Monomers; 1.4 Synthesis of Polymers with Complex Architectures; 1.5 Stereochemistry and Sequence Control in ROMP; 1.6 Conclusion; References; Chapter 2 ROMP in Dispersed Media; 2.1 Introduction; 2.2 Emulsion ROMP; 2.2.1 Mini-emulsion ROMP; 2.2.2 Micro-emulsion ROMP; 2.2.3 Micellar ROMP; 2.2.4 ROMP in Nonaqueous Emulsions; 2.3 Dispersion ROMP; 2.3.1 Biomedical Applications of PNBE-PEO Core-Shell Nanoparticles; 2.4 Suspension ROMP 2.5 Formation of Nanoparticles 2.5.1 Photoactive ROMP Assemblies; 2.5.2 Miscellaneous; 2.6 Conclusion; References; Chapter 3 Telechelic Polymers; 3.1 Introduction; 3.2 Mono-telechelic Polymers; 3.2.1 Reaction with Substituted Vinyl Ethers; 3.2.2 Vinyl Lactone Quenching; 3.2.3 Terminal Cross Metathesis; 3.2.3.1 Using Symmetrical Olefins; 3.2.3.2 Using Asymmetrical Olefins; 3.2.4 Reaction with Oxygen; 3.2.5 Sacrificial Diblock Copolymer Synthesis; 3.2.6 Catalyst Prefunctionalization; 3.2.6.1 Functional Catalysts from Precursor Complexes; 3.2.6.2 Functional Catalysts via Cross Metathesis 3.2.7 Aldehyde Quenching 3.3 Homo-telechelic Polymers; 3.3.1 Degradation of Unsaturated Polymers and ADMET Polymerization; 3.3.2

ROMP/Chain Transfer; 3.3.3 Sacrificial Multiblock Copolymers; 3.4 Hetero-telechelic Polymers; 3.4.1 Prefunctionalization with Functional Alkylidene Initiators; 3.4.2 Prefunctionalization with Sacrificial Synthesis; 3.5 Conclusions and Outlook; Acknowledgments; References; Chapter 4 Supramolecular Polymers; 4.1 Introduction; 4.2 Main-Chain Supramolecular Polymers; 4.2.1 Macromonomers; 4.2.2 ABC Triblock Copolymers; 4.3 Side-Chain-Functionalized Supramolecular Polymers
4.3.1 Hydrogen-Bonding Recognition Motifs
4.3.2 Metal Coordination-Based Recognition Motifs; 4.3.3 Mixed Orthogonal Recognition Motifs; 4.4 Supramolecular Architectures by Design; 4.5 Conclusion; References; Chapter 5 Synthesis of Materials with Nanostructured Periodicity; 5.1 Introduction; 5.2 Sequential ROMP; 5.3 Inorganic Composite Materials; 5.4 ABA Triblock Copolymers; 5.5 Nanostructures with Domain Sizes Exceeding 100 nm; 5.6 Conclusions; References; Chapter 6 Synthesis of Nanoparticles; 6.1 Introduction; 6.2 Formation of Nanoparticles; 6.3 Synthesis via Grafting-through Approach
6.4 Synthesis via Grafting-to Approach
6.4.1 Grafting-to Polymer Backbones via an Activated Ester; 6.4.2 Grafting-to Polymer Backbones via Copper-Catalyzed Click Reaction; 6.5 Synthesis via Grafting-from Approach; 6.6 Summary; References; Chapter 7 Synthesis of Biodegradable Copolymers; 7.1 Introduction; 7.2 Polyester-Functionalized Polymers; 7.3 Peptide-Functionalized Polymers; 7.4 Carbohydrate-Functionalized Polymers; 7.5 Antimicrobial Polymers; 7.6 Polymeric Betaines; 7.7 ROMP Polymers as Drug Carriers; 7.8 ROMP Polymers for Tissue Scaffolds; 7.9 Conclusion; References
Chapter 8 Biologically Active Polymers

Sommario/riassunto

The second edition of this ultimate reference in this field is completely updated and features more than 80% new content, with emphasis on new developments in the field, especially in industrial applications. No other book covers the topic in such a comprehensive manner and in such high quality. Edited by the Nobel laureate R. H. Grubbs and E. Khosravi, this volume 3 of the 3-volume work focusses on polymer synthesis. With a list of contributors that reads like a "Who's-Who" of metathesis, this is an indispensable one-stop reference for chemists in academia and industry. Other available
