1. Record Nr.   UNINA9910808018803321

   Titolo   Infinity and truth / / editors, Chitat Chong, Qi Feng, National University
                        of Singapore, Singapore, Theodore A. Slaman, W. Hugh Woodin,
                        University of California, Berkeley, USA

   Pubbl/distr/stampa   New Jersey : , : World Scientific, , [2014]
                        2014

   ISBN   981-4571-04-0

   Descrizione fisica   1 online resource (ix, 234 pages) : illustrations

   Collana   Lecture notes series (Institute for Mathematical Sciences, National
                        University of Singapore), , 1793-0758 ; ; volume 25

   Disciplina   510.1

   Soggetti   Logic, Symbolic and mathematical
                        Mathematics - Philosophy
                        Set theory
                        Axiomatic set theory

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   "Based on the talks given at the Workshop on Infinity and Truth held at
                        the Institute for Mathematical Sciences, National University of
                        Singapore, from 25 to 29 July 2011."

   Nota di bibliografia Includes bibliographical references.

   Nota di contenuto   section I. Invited lectures -- section II. Special session.

   Sommario/riassunto   This volume is based on the talks given at the Workshop on Infinity and
                        Truth held at the Institute for Mathematical Sciences, National
                        University of Singapore, from 25 to 29 July 2011. The chapters cover
                        topics in mathematical and philosophical logic that examine various
                        aspects of the foundations of mathematics. The theme of the volume
                        focuses on two basic foundational questions: (i) What is the nature of
                        mathematical truth and how does one resolve questions that are
                        formally unsolvable within the Zermelo-Fraenkel Set Theory with the
                        Axiom of Choice, and (ii) Do the discoveries in mathematic
