

1. Record Nr.	UNINA9910808034903321
Autore	D'Arrigo Rosanne <1954->
Titolo	Dendroclimatic studies : tree growth and climate change in northern forests // Rosanne D'Arrigo [and four others]
Pubbl/distr/stampa	Washington, District of Columbia ; ; Hoboken, New Jersey : , : American Geophysical Union : , : Wiley, , 2014 ©2014
ISBN	1-118-84871-3 1-118-84854-3 1-118-84876-4
Descrizione fisica	1 online resource (103 p.)
Collana	Special Publications
Disciplina	577.3
Soggetti	Old growth forests - Climatic factors - Northern Hemisphere Trees - Climatic factors - Northern Hemisphere Climate change mitigation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Special Publications 67."
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Dendroclimatic Studies: Tree Growth and Climate Change in Northern Forests; Copyright; Contents; Preface; Acknowledgments; 1. Introduction; 1.1. Overview; 1.2. Basic Tree-Ring Principles; 1.3. Polar Amplification of Global Warming and Impacts on Forests; 1.4. "Northern Archive" Synthesis; 2. Tree-Ring Investigations at Northern Latitudes; 2.1. Initial Studies; 2.2. Site Selection; 2.3. Tree-Ring Parameters and Processing: Ring Width and Maximum Latewood Density; 3. Selected Local to Regional TRL-LDEO Northern Tree-Ring Studies; 4. The Broader Context of Northern Dendroclimatic Studies 4.1. North America 4.2. Eurasia; 4.3. Tree-Ring Chronology Networks; 5. Temperature Reconstructions for the Northern Hemisphere; 5.1. Initial Attempts; 5.2. Evolution of NH Temperature Reconstructions; 5.3. Reconstructed NH Temperature Trends; 5.4. Standardization of NH Tree-Ring Temperature Reconstructions; 6. Tree Growth Issues in the Anthropogenic Era: CO2 Fertilization and the "Divergence Problem"; 6.1. CO2 Fertilization; 6.2. The Divergence Problem; 7. Conclusions and Future Challenges; Glossary; References; Core TRL-LDEO Publications

on Northern Forests; 2010-Present; 2009; 2008; 2007
2006; 2005; 2004; 2003; 2002; 2001; 2000; 1999; 1998; 1997; 1996;
1995; 1993; 1992; 1991; 1989; 1988; 1987; 1985; 1982; 1981;
Related Reports; Index; Supplementary Images

Sommario/riassunto

A top priority in climate research is obtaining broad-extent and long-term data to support analyses of historical patterns and trends, and for model development and evaluation. Along with directly measured climate data from the present and recent past, it is important to obtain estimates of long past climate variations spanning multiple centuries and millennia. Dendroclimatic Studies at the North American Tree Line presents an overview of the current state of dendroclimatology, its contributions over the past few decades, and its future potential. The material included is not useful
