Problems of living with otherness; 27. Changing ideas of wildness; Notes; Index
Sommario/riassunto	With a new Introduction by the author'An elegant and sane little book. - The New StatesmanMyths, as Mary Midgley argues in this powerful book, are everywhere. In political thought they sit at the heart of

theories of human nature and the social contract; in economics in the pursuit of self interest; and in science the idea of human beings as machines, which originates in the seventeenth century, is a today a potent force. Far from being the opposite of science, however, Midgley argues that myth is a central part of it. Myths are neither lies nor mere stories bu
