

1. Record Nr.	UNINA9910808084403321
Autore	Chambers R. L (Ray L.)
Titolo	Maximum likelihood estimation for sample surveys // R.L. Chambers. [et al.]
Pubbl/distr/stampa	Boca Raton, Fla. : , : CRC Press, , 2012
ISBN	0-429-14472-5 1-4200-1135-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (374 p.)
Collana	Monographs on statistics and applied probability ; ; 125
Disciplina	001.4 001.4/33 001.433
Soggetti	Sampling (Statistics) Surveys - Statistical methods
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"A Chapman & Hall book."
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Front Cover; Dedication; Contents; Preface; 1. Introduction; 2. Maximum likelihood theory for sample surveys; 3. Alternative likelihood-based methods for sample survey data; 4. Populations with independent units; 5. Regression models; 6. Clustered populations; 7. Informative nonresponse; 8. Maximum likelihood in other complicated situations; Notation
Sommario/riassunto	Sample surveys provide data used by researchers in a large range of disciplines to analyze important relationships using well-established and widely used likelihood methods. The methods used to select samples often result in the sample differing in important ways from the target population and standard application of likelihood methods can lead to biased and inefficient estimates. Maximum Likelihood Estimation for Sample Surveys presents an overview of likelihood methods for the analysis of sample survey data that account for the selection methods used, and includes
