Sommario/riassunto	The languages of Aboriginal Australians have attracted a considerable amount of interest among scholars from such diverse fields as linguistics, political studies, archaeology or social history. As a result, there is a large number of studies on a variety of issues to do with

Aboriginal Australian languages and the social contexts in which they are used. There is, however, no integrative reader that is easily accessible to the non-specialist in any of the areas concerned. The collection edited by Leitner and Malcolm fills this gap. Looking at Aborigines and Torres Strait Islanders and their changing habitats from pre-colonial times to the present, the book covers languages from a structural and functional linguistic perspective, moves on to the issue of cultural maintenance and then turns to language policy, planning and the educational and legal dimensions. Among the many themes discussed are: the social and linguistic history of language contact after 1788 (including the Macassans); the demographic base of indigenous languages; traditional indigenous languages; results of language contact such as the modification of traditional languages and the rise of contact languages (pidgins, creoles, esp. Kriol, Torres Strait Creole, and Aboriginal English); the impact of the Aboriginal languages on mainstream Australian English; maintenance, shift, revival and documentation of indigenous and contact languages; language planning; language in education; language in the media; language in the law courts. The contributors are leading experts in their fields. The book can serve as a reader for university courses but also as a state-of-the-art work and resource for specialists like applied linguists or educational planners.

2. Record Nr.	UNINA9910713435003321
Autore	Reid Henry John Edward
Titolo	The N.A.C.A. recording tachometer and angle of attack recorder / / by H.J.E. Reid
Pubbl/distr/stampa	[Washington, D.C.] : , : National Advisory Committee for Aeronautics, , 1923

Sommario/riassunto	"Based on the longest-running survey of its kind in Canada, this book examines events in the lives of a generation of Ontario residents who graduated from grade twelve in 1973. The study recreates the world of the early 1970s in which these high school students faced the future. It recounts their educational and occupational experiences in the late 1970s, follows their vocational and career pathways during the

subsequent decade, and searches for patterns in their personal and family lives through the late 1980s and early 1990s."--Jacket

4. Record Nr.	UNISANNIOTO00721182

Sommario/riassunto	Genius Explained addresses the belief that genius is born not made. Controversially, it suggests genius is not a mysterious gift but the product of environment, personality and hard work and looks at the lives of, amongst others, Charles Darwin, George Eliot, the Bronte sisters, Michael Faraday and Albert Einstein.
