Nota di contenuto	Contents; Contributors; Part I: A Look Back at a Quarter Century of the Descriptive Model of Classification; Part II: Empirical and Theoretical Perspectives on Diagnosis; Part III: Classification and Specific Anxiety Problems; Index
Sommario/riassunto	This book synthesizes the best of the new research related to anxiety disorders and how they are classified and diagnosed. Dr. Dean McKay and his co-editors have brought together leading authorities from multiple theoretical traditions to present the new directions and perspectives in the field of anxiety research. The contributors also discuss why current classification systems are inadequate, and what revisions should be made. The book presents in-depth discussions of how anxiety disorders are understood and assessed, as well as potential new implications for DSM-V. Key features: Covers the
