Sommario/riassunto	How natural is religion? Is it a phenomenon written in our genes or brains, naturally developing with the development of the human race? The book considers the findings of evolutionary psychology from scientific, philosophical and theological perspectives and critically examines the relation between empirical, epistemological and theological notions. Chapters in the book deal with the aturalness of religion and religious experiences as based on genetics, biology and social psychology. Other authors examine the relationship between religion, science and theology with regard to the naturalness o
