Sommario/riassunto

Almost everyone today affirms the importance and merit of religious liberty. But religious liberty is being challenged by new questions (for example, use of the niqab or church adoption services for same-sex couples) and new forces (such as globalization and Islamism). Combined, these make the meaning of religious liberty in the twenty-first century uncertain. This collection of essays by ten of the world's leading scholars on religious liberty takes aim at these issues. The book is arranged around five specific challenges to religious liberty today: the state's responsibility to prevent coercion and intimidation of believers by others within the same faith community; the US's basic moral responsibilities to promote religious liberty abroad; how to understand and apply the traditional right of conscientious objection in today's circumstances; the distinctive problems presented by globalization; and the viability today of an 'originalist' interpretation of the First Amendment religion clauses.

Sommario/riassunto	South Central Los Angeles is often characterized as an African American community beset by poverty and economic neglect. But this depiction obscures the significant Latina/o population that has called South Central home since the 1970's. More significantly, it conceals the efforts African American and Latina/o residents have made together in shaping their community. As residents have faced increasing challenges from diminished government social services, economic disinvestment, immigration enforcement, and police surveillance, they have come together in their struggle for belonging and justice. South Central Is Home investigates the development of relational community formation and highlights how communities of color like South Central experience racism and discrimination—and how in the best of situations, they are

energized to improve their conditions together. Tracking the demographic shifts in South Central from 1945 to the present, Abigail Rosas shows how financial institutions, War on Poverty programs like Headstart for school children, and community health centers emerged as crucial sites where neighbors engaged one another over what was best for their community. Through this work, Rosas illuminates the promise of community building, offering findings indispensable to our understandings of race, community, and place in U.S. society.
