Integration of financial markets in the European Union: Regulation and supervision framework; 4. National and sectoral integration of Chinese and Russian stock markets with world markets; 5. Integration of credit markets in the Visegrad countries with the euro area
Sommario/riassunto	This edited collection assesses the level of financial integration in the European Union (EU) and the differences across the countries and segments of the EU financial system. Progress in financial integration is key to the EU's economic growth and competitiveness and although it has advanced substantially, the process is still far from completion. This book focuses on the pace of financial integration in the EU with special emphasis on the new EU Member States and investigates their progress in comparison with 'old' EU countries. The book is the first of

its kind to include and eval
