

1. Record Nr.	UNINA9910808297903321
Titolo	Advanced oil crop biorefineries [[electronic resource] /] / edited by Abbas Kazmi
Pubbl/distr/stampa	Cambridge, : RSC Pub., 2012
ISBN	1-62198-131-2 1-84973-273-6
Descrizione fisica	1 online resource (337 p.)
Collana	RSC green chemistry, , 1757-7039 ; ; no. 14
Altri autori (Persone)	KazmiAbbas
Disciplina	662.88
Soggetti	Biomass energy Oilseed plants - Biotechnology Energy crops Vegetable oils
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	i-iv; v-vi; vii-x; 1-47; 48-101; 102-165; 166-202; 203-279; 280-310; 311-326
Sommario/riassunto	In Europe, the main oil-rich crops are sunflower, rapeseed and olive which are grown primarily for food. This book discusses how to convert this whole crop into energy (fuels, power and heat), food and bioproducts (chemicals and/or materials), whilst making optimal use of the by-products generated during farming/harvesting, primary processing (oil extraction and refining) and secondary processing (transesterification). The resulting processes are more economically competitive and the business margin for oil and biodiesel manufacturers is improved. Previously, oil crops have been the main point
