Legal and policy considerations -- Annex 1. Further reading and resources -- Annex 2. International consensus documents in relation to safe abortion -- Annex 3. Instruments and supplies for manual vacuum aspiration (MVA) -- Annex 4. Contraception following abortion.
Sommario/riassunto	In June 1999, a United Nations General Assembly Special Session reviewed and appraised progress toward implementation of the Programme of Action of the International Conference on Population and Development (ICPD) held in Cairo, 1994. At this Special Session, the Governments of the world again recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services.
