Sommario/riassunto	Workers and Narratives of Survival in Europe explores the growing problem of job uncertainty in Europe at the end of the twentieth century. The management of professional precariousness is reconsidered against the backdrop of far-reaching social, economic, and political changes in Europe in recent decades, including: the instability of the traditional family; the emergence of new forms of parenthood; globalization of the economic sphere; attempts to impose

a uniform pattern of culture; and the breakdown of borders with former Communist countries. The contributors utilize extensive field studies in both Western and Central Europe to understand the meaning of professional uncertainty, as perceived by its victims, and the strategies they develop to face it.
