Sommario/riassunto

First published in 1984, this title discusses the emergence of both the orthodox and political economy based approaches to underdevelopment in geography , critically assessing their strengths and weaknesses, and showing the relationship between intellectual developments and changing material conditions. The work is primarily concerned with theories, though it does contain much empirical material drawn from throughout the Third World. The book examines the emergence of theories of development historically and considers the various contemporary theoretical 'schools', both Marxist and non-Marxist
