Sommario/riassunto

Aldred's interlinear gloss to the Lindisfarne Gospels (London, British Library, MS Cotton Nero D.IV) is one of the most substantial representatives of the Old English variety known as late Old Northumbrian. Although it has received a great deal of attention in the past two centuries, there are still numerous issues which remain unresolved. The papers in this collection approach the gloss from a variety of perspectives - language, cultural milieu, palaeography, glossography - in order to shed light on many of these issues, such as the authorship of the gloss, the morphosyntax and vocabulary of the dialect(s) it represents, its sources and relationship to the Rushworth Gospels, and Aldred's cultural and religious affiliations. Because of its breadth of coverage, the collection will be of interest and great value to scholars in the fields of Anglo-Saxon studies and English historical linguistics.

Sommario/riassunto

The first workshop in this series was held at the International Computer Science Institute in Berkeley and was published as LNCS 2009 under the name "Workshop on Design Issues in Anonymity and Unobservability." Subsequent Privacy Enhancing Technologies (PET) workshops met in San Francisco in 2002 (LNCS2482) and Dresden in 2003 (LNCS2760). This volume, LNCS3424, holds the proceedings from PET 2004 in Toronto. Our 2005 meeting is scheduled for Dubrovnik, and we hope to keep finding new and interesting places to visit on both sides of the Atlantic - or beyond. An event like PET 2004 would be impossible without the work and dedication of many people. First and foremost we thank the authors, who wrote and submitted 68 full papers or panel proposals, 21 of which appear herein. The Program Committee produced 163 reviews in total. Along the way, they were assisted in reviewing by Steven Bishop, Rainer Bohme, Sebastian Clauß, Claudia D'Áz, Richard E. Newman, Ulrich Flegel, Elke Franz, Stefan Kopsell, Thomas Krieglstein, Markus Kuhn, Stephen Lewis, Luc Longpre, Steven Muchnick, Shishir Nagaraja, Thomas Nowey, Peter Palfrader, Lexi Pimenidis, Klaus Ploessl, Sivaramakrishnan Rajagopalan, Marc Rennhard, Leo Reyzin, Pankaj Rohatgi, Naouel Ben Salem, Sandra Steinbrecher, Mike Szydlo, Shabsi Wal'sh, Jie Wang, Brandon Wiley, and Shouhuai Xu.
