Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The status quo media -- Uncharacteristically blunt scientists -- The clean energy solution -- Peak oil? Consider it solved -- The clean energy new deal -- The Bush-Cheney reign of error -- The right-wing disinformation machine -- Diagnosing someone with anti-scientific syndrome (ASS) -- Why are progressive so lousy at messaging? -- Conclusion : is the global economy a Ponzi scheme?
Sommario/riassunto	In 2009, Rolling Stone named Joe Romm to its list of "100 People Who Are Changing America." Romm is a climate expert, physicist, energy consultant, and former official in the Department of Energy. But it's his influential blog, one of the "Top Fifteen Green Websites" according to Time magazine, that's caught national attention. Climate change is far more urgent than people understand, Romm says, and traditional media, scientists, and politicians are missing the story. Straight Up draws on Romm's most important posts to explain the dangers of and solutions to climate change that you won't find in newspapers, in journals, or on T.V.
