

1. Record Nr.	UNINA9910808610503321
Autore	Whittaker Robert J
Titolo	Island biogeography [[electronic resource]] : ecology, evolution, and conservation // Robert J. Whittaker, and Jose Maria Fernandez-Palacios
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2007
ISBN	1-383-02951-2 1-281-93071-7 9786611930714 0-19-152416-6 1-4356-0595-0
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (416 p.)
Collana	Oxford biology
Altri autori (Persone)	Fernandez-PalaciosJose Maria <1953->
Disciplina	578.75/2
Soggetti	Island ecology Evolution (Biology) Conservation biology Biogeography Human ecology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 351-381) and index.
Nota di contenuto	Preface and acknowledgements; Contents; Part I: Islands as Natural Laboratories; Part II: Island Ecology; Part III: Island Evolution; Part IV: Islands and Conservation; Glossary; References; Index
Sommario/riassunto	A definitive review of the island literature, explaining how islands have been used as natural laboratories in developing and testing ecological and evolutionary theories. - ;Island biogeography is the study of the distribution and dynamics of species in island environments. Due to their isolation from more widespread continental species, islands are ideal places for unique species to evolve, but they are also places of concentrated extinction. Not surprisingly, they are widely studied by ecologists, conservationists and evolutionary biologists alike. There is no other recent textbook devoted
