Sommario/riassunto	This timely e-book presents a cross section of the legal research which is currently being undertaken in the built environment academic community. The articles address a wide range of traditional legal subject areas including property law, construction law, housing law,

regulatory frameworks, IT law, historic buildings legislation and legal education. Their uniqueness however lies in the legal contribution that each of them make in addressing the problems and challenges of the built environment, in addition, of course, to the development of legal knowledge within their particular legal special
