

1. Record Nr.	UNINA9910808716203321
Titolo	Facilitating innovation in the federal statistical system : summary of a workshop // Hermann Habermann, rapporteur ; Committee on National Statistics, Division of Behavioral and Social Science and Education, National Research Council of the National Academies
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2011
ISBN	0-309-21464-5 1-283-21348-6 9786613213488 0-309-21462-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (80 p.)
Altri autori (Persone)	HabermannHermann
Disciplina	317.3
Soggetti	United States Statistics Technological innovations
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""Acknowledgments""; ""Contents""; ""1 Introduction""; ""2 Scope and Importance of Innovation""; ""3 Barriers to Innovation""; ""4 Possible Remedies to Barriers""; ""5 Next Steps""; ""References""; ""Appendix A: Workshop Agenda""; ""Appendix B: Workshop Attendees""; ""Committee on National Statistics""
Sommario/riassunto	"On May 8, 2009, the symposium, The Federal Statistical System: Recognizing Its Contributions, Moving It Forward was held in Washington, DC. One of the topics considered at that symposium was the health of innovation in the federal statistical system. A consequence of the symposium was an agreement by the Committee on National Statistics to hold a workshop on the future of innovation in the federal statistical system. This workshop was held on June 29, 2010. The original statement of task for the workshop focused on three challenges to the statistical system: (1) the obstacles to innovative, focused research and development initiatives that could make statistical programs more cost effective; (2) a gap between emerging data visualization and communications technologies and the ability of statistical agencies to understand and capitalize on these developments

for their data dissemination programs; and (3) the maturation of the information technology (IT) discipline and the difficulties confronting individual agencies in keeping current with best practice in IT regarding data confidentiality. This report, *Facilitating Innovation in the Federal Statistical System*, is a descriptive summary of what transpired at the workshop. It is therefore limited to the views and opinions of the workshop participants. However, it does not strictly follow the agenda of the workshop, which had four sessions. Instead, it is organized around the themes of the discussions, which migrated across the four sessions."--Publisher's description.
