

1. Record Nr.	UNINA9910808744303321
Autore	Stavroulakis Peter
Titolo	Interference analysis and reduction for wireless systems // Peter Stavroulakis
Pubbl/distr/stampa	Boston, MA, : Artech House, c2003
ISBN	1-58053-574-7
Edizione	[1st ed.]
Descrizione fisica	1 online resource (427 p.)
Collana	Mobile communications series
Disciplina	621.382/24
Soggetti	Radio - Interference Cell phone systems - Protection
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: 1. Overview of Wireless Information Systems -- 2. Wireless Channel Characterization and Coding -- 3. Transmission Systems in an Interference Environment -- 4. Optimal Detection in Fading Channels -- 5.
Sommario/riassunto	"Interference Analysis and Reduction for Wireless Systems offers a New methodology for analyzing and studying the behavior of wireless communication systems in an interference environment. It provides modern tools and techniques for use in real-world applications that help engineers guarantee optimum system performance. The book treats both additive and multiplicative interfering signals, including in-depth descriptions of how these signals behave, regardless of the source. Hands-on details are provided to help practitioners."--Jacket.
