Sommario/riassunto	This book studies Southern environmental policy and politics in order to understand the concrete realities of the Southeast and extend those realities' understanding to other regions of the country. It analyzes a series of cases that describe the state of environmental policy implementation and management in the South. These case studies cover a range of environmental areas, including air quality, drinking water and wastewater, brownfields, collaborative environmental

management, and environmental justice, among others. These cases explore the diversity and flexibility which compose the domina
