

1. Record Nr.	UNISALENT0991000961709707536
Autore	International symposium on electron and photon interactions at high energies
Titolo	4 fourth International symposium on electron and photon interactions at high energies / edited by D. Braben, S. Lowndes, R. Rand
Pubbl/distr/stampa	Daresbury : Daresbury Nuclear Physics Laboratory, 1969
Descrizione fisica	1 v. : ill.
Collana	International symposium on electron and photon interactions at high energies ; 4
Classificazione	53(082.2) 53.3.2/53.3.4
Altri autori (Persone)	Braben, D. Lowndes, S. Rand, R.
Soggetti	High energy physics - Congresses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910808871903321
Autore	Gupton Timothy
Titolo	The syntax-information structure interface : clausal word order and the left periphery in Galician / / by Timothy Gupton
Pubbl/distr/stampa	Boston : , : De Gruyter Mouton, , [2014] ©2014
ISBN	1-61451-205-1 1-5015-0030-9
Descrizione fisica	1 online resource (308 p.)
Collana	Interface explorations, , 1861-4167 ; ; 29
Classificazione	IZ 7680
Disciplina	469/.95
Soggetti	Galician language - Syntax Galician language - Grammar Galician language - Word order Grammar, Comparative and general - Topic and comment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front matter -- Contents -- List of Tables and Figures -- Preface -- 1. Introduction -- 2. The interaction between syntax and information structure -- 3. Methodology -- 4. Statistical analysis of quantitative and qualitative measures -- 5. Toward a Left-peripheral Syntactic Analysis of Galician -- 6. Appendix A. Linguistic questionnaire for initial tasks -- 7. Appendix B. Task 1: Appropriateness Judgment Task -- 8. Appendix C. Task 2: Word order preference task -- 9. APPENDIX D. Task 3: Recorded field interview -- 10. Appendix E. Follow-up WPT: for narrow-focus in Task 2 -- References -- Index
Sommario/riassunto	It is quite remarkable that, after over a half-century of generative grammar, there is still uncertainty with respect to the analysis of preverbal subjects in a number of languages. According to canonical analyses, preverbal subjects are arguments (A-elements). However, following non-canonical analyses, preverbal subjects are not arguments, but rather A'-elements that behave like topical preverbal direct and indirect objects, which have received a CLLD analysis in the literature (e.g. Cinque 1990). The implications of this debate are far-reaching for generative theory: if preverbal subjects are non-

arguments, one must question the universality of the EPP (as in e.g. Alexiadou & Agnostonopoulou 1998), as well as its associated features and feature-strengths. Galician is an under documented Romance language within the generative paradigm. In this book, I develop an experimental program for establishing clausal word order preferences for a number of information structure contexts. The preference data suggest that preverbal subjects behave like canonical elements, and not CLLD elements. These results inform the model of the preverbal field that I propose for Galician, which also takes into account the enclisis-proclisis divide and reco.

It is quite remarkable that, after over a half-century of research in generative grammar, there is still uncertainty and debate surrounding the analysis of preverbal subjects in a number of null-subject languages. The implications of this debate are far-reaching for generative theory: if preverbal subjects are analyzed as non-arguments, it calls into question the proposed universality of the EPP (as in e.g. Alexiadou & Agnostonopoulou 1998), as well as its associated features and feature-strengths. Galician, spoken in the northwest of Spain, is an under-documented Romance language within the generative paradigm. In this book, the author details an experimental program for establishing clausal word order appropriateness and preferences in a variety of information structure contexts, while informing theoretical debate on preverbal subjects. The experimental methodology and information structure assumptions employed create several testable predictions. The statistical data suggest that Galician is a predominantly SVO language and that preverbal subjects behave like canonical subjects, and not CLLD constituents. The empirical data discussed inform the modified model of the preverbal field that the author proposes for Galician, which takes into account a number of recent analyses of Western Iberian Romance clausal phenomena such as the enclisis-proclisis divide, topicalization, focalization, and recomplementation.
