Autore	Taylor Rachel M.
Titolo	The role of public-private partnerships in health systems strengthening : workshop summary // Institute of Medicine (U.S.) ; Rachel M. Taylor and Jennifer Christian, rapporteurs
Pubbl/distr/stampa	Washington, District of Columbia : , : The National Academies Press, , 2016 ©2016
ISBN	0-309-38142-8 0-309-38140-1
Descrizione fisica	1 online resource (127 pages)
Disciplina	362.1
Soggetti	Medical policy - International cooperation
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Introduction -- Setting the context -- Multistakeholder perspectives on public-private partnerships for health systems strengthening -- Promising innovations and models -- Lessons from partnership experiences -- Measuring performance and progress in public-private partnerships for health systems strengthening -- Sustaining and increasing long-term investments in health systems -- References -- Appendix A: A review of public-private partnership activities in health system strengthening -- Appendix B: Workshop agenda -- Appendix C: Speaker biographical sketches.
Sommario/riassunto	"Over the past several decades, the public and private sectors made significant investments in global health, leading to meaningful changes for many of the world's poor. These investments and the resulting progress are often concentrated in vertical health programs, such as child and maternal health, malaria, and HIV, where donors may have a strategic interest. Frequently, partnerships between donors and other stakeholders can coalesce on a specific topical area of expertise and interest. However, to sustain these successes and continue progress, there is a growing recognition of the need to strengthen health systems more broadly and build functional administrative and technical infrastructure that can support health services for all, improve the

health of populations, increase the purchasing and earning power of consumers and workers, and advance global security. In June 2015, the National Academies of Sciences, Engineering, and Medicine held a workshop on the role of public-private partnerships (PPPs) in health systems strengthening. Participants examined a range of incentives, innovations, and opportunities for relevant sectors and stakeholders in strengthening health systems through partnerships; to explore lessons learned from previous and ongoing efforts with the goal of illuminating how to improve performance and outcomes going forward; and to discuss measuring the value and outcomes of investments and documenting success in partnerships focused on health systems strengthening. This report summarizes the presentations and discussions from the workshop"--Publisher's website.
