1. Record Nr. UNINA9910808933303321

Autore	Grady Jeffrey O
Titolo	System verification [[electronic resource]] : proving the design solution satisfies the requirements / / Jeffrey O. Grady
Pubbl/distr/stampa	Amsterday ; ; Boston, : Elsevier/Academic Press, c2007
ISBN	1-281-05067-9 9786611050672 0-08-048978-8
Descrizione fisica	1 online resource (367 p.)
Disciplina	620.001/171
Soggetti	Process control Systems engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Front Cover; System Verification; Copyright Page; Table of Contents; LIST OF ILLUSTRATIONS; LIST OF TABLES; PREFACE; ACKNOWLEDGMENTS; LIST OF ABBREVIATIONS; Part 1 SETTING THE STAGE; Chapter 1.1 The Global Verification Situation; 1.1.1 The Meaning of the Word Verification; 1.1.2 Verification Classes; 1.1.2.1 Item Qualification; 1.1.2.2 Item Acceptance; 1.1.2.3 System Test and Evaluation; 1.1.3 Feedback into Product Models; 1.1.4 Technical Data Assessment; 1.1.5 Process Verification; 1.1.6 Program Assembly of the Verification Process; 1.1.6.1 High-Rate Production Program 1.1.6.2 Low-Volume, High-Dollar Production Program1.1.6.3 One-of-a-Kind Production Program; 1.1.7 Verification Documentation Intensity; 1.1.8 In the Aggregate; Chapter 1.2 Introduction to System Development; 1.2.1 What Is a System?; 1.2.2 System Development; 1.2.3 Three Steps on the Way to Great Systems; 1.2.4 Organizational Structure; 1.2.5 The Systems Approach; 1.2.6 The Two Vs; 1.2.7 The Foundation of System Engineering; 1.2.8 System Development Phasing Overview; 1.2.9 Toward a Standard Process; 1.2.10 Development Environments; 1.2.10.1 The Waterfall Development Model 1.2.10.2 The Spiral Development Model1.2.10.3 The V Development Model; 1.2.10.4 The N Development Model; 1.2.10.5 Development Environment Integration; Chapter 1.3 Requirements Analysis Overview;

1.3.1 Requirements; 1.3.2 The Need and Its Initial Expansion Using Traditional Structured Analysis; 1.3.3 Structured Decomposition Using Traditional Structured Analysis; 1.3.3.1 Functional Analysis; 1.3.3.2 Performance Requirements Analysis; 1.3.3.3 Design Constraints Analysis; 1.3.3.3.1 Interface Requirements Analysis; 1.3.3.3.2 Environmental Requirements Analysis
1.3.3.3.3 Specialty Engineering Requirements Analysis1.3.4 Computer Software Approaches; 1.3.5 Verification Requirements; 1.3.6 Applicable Documents; 1.3.7 Process Requirements Analysis; Part 2 ITEM QUALIFICATION VERIFICATION; Chapter 2.1 Verification Requirements; 2.1.1 Verification Documentation; 2.1.2 Item Planning Fundamentals; 2.1.2.1 Traceability Matrix; 2.1.2.2 Verification Methods; 2.1.2.3 Product and Verification Levels; 2.1.2.4 Verification Classes; 2.1.2.5 Items Subject to Qualification and Acceptance; 2.1.2.6 Verification Directionality; 2.1.2.7 Product Verification Layering
2.1.2.8 Verification Requirements Definition Timing2.1.3 Verification Requirements Analysis; 2.1.3.1 Selecting the Method; 2.1.3.2 Writing Responsibility and Support; 2.1.3.3 Writing the Verification Paragraph; 2.1.4 Verification Planning, Data Capture, and Documentation; 2.1.5 Section 4 Structure; 2.1.5.1 MIL-STD-961E Structure; 2.1.5.2 An Alternate Structure; 2.1.5.3 External Verification Requirements Documentation; 2.1.6 Verification Computer Databases; Chapter 2.2 Top-Down Verification Planning; 2.2.1 A Matter of Scale; 2.2.2 Expansion of Function F44; 2.2.3 Item Qualification Process
2.2.4 The Planning Transform

Sommario/riassunto

Systems Engineering--an interdisciplinary, multi-stage-driven approach to the design and implementation of any large-scale or complex engineered product or service--has found its way from aerospace into general manufacturing as well as the services industry. It has been found to be particularly useful in such applications as software engineering, the bio- and medical industries, and large, multi-component projects like those found in energy-generation. Following on the author's previous book System Requirements Analysis, this new book will lay out the steps and procedures needed to implement
