1. Record Nr. UNINA9910808966003321

Autore	Burlak Gennadiy
Titolo	The classical and quantum dynamics of the multispherical nanostructures [[electronic resource] /] / Gennadiy Burlak
Pubbl/distr/stampa	London, : Imperial College Press, c2004
ISBN	1-281-34747-7 9786611347475 1-86094-603-8
Edizione	[1st ed.]
Descrizione fisica	1 online resource (400 p.)
Disciplina	314 620.5
Soggetti	Nanostructures Quantum theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 364-376) and index.
Nota di contenuto	Preface; Contents; Introduction; I Classical Dynamics; II The Quantum Phenomena in Microspheres; III Numerical Methods and Object-Oriented Approach to the Problems of Multilayered Microsystems; Appendix A: Calculation of Field's Energy in a Sphere; Appendix B: Calculation of Surface Integral; Appendix C: Continuity of Tangential Fields; Appendix D: Integral on Bessel Functions; Appendix E: Surface Integrals for Dipole; Appendix F: Some Mathematical Formulas; Appendix G: Various Head *.h Files; Bibliography; Index
Sommario/riassunto	In this book, the issues regarding the theory of optics and quantum optics of spherical multilayered systems are studied. In such systems the spatial scale of layers becomes comparable with the wavelength of radiation, which complicates the analysis of important quantities such as reflectivity and transmission.
