

1. Record Nr.	UNINA9910809047303321
Autore	Sturdivant Rick
Titolo	Systems engineering of phased arrays // Rick Sturdivant, Clifton Quan, Enson Chang
Pubbl/distr/stampa	Boston : , : Artech House, , [2019] [Piscataway, New Jersey] : , : IEEE Xplore, , [2018]
ISBN	1-63081-489-X 9781630814098
Edizione	[1st ed.]
Descrizione fisica	1 PDF (xxi, 291 pages) : illustrations
Collana	Artech House radar series
Disciplina	621.382/4
Soggetti	Phased array antennas - Design and construction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Systems Engineering of Phased Arrays -- Contents -- Preface -- Acknowledgments -- Part I System Engineering Activities -- 1 The Systems Engineering Process and Its Application to Phased Arrays -- 1.1 Introduction -- 1.2 Methodological Reductionism -- 1.3 The Systems Engineering Approach -- 1.4 The Three-Phase Process -- 1.5 Phase 1: Concept Development -- 1.5.1 Needs Analysis -- 1.5.2 Alternatives Exploration -- 1.5.3 Trade Studies and Baseline Selection -- 1.5.4 New Technology Validation -- 1.5.5 Risk Management Plan -- 1.5.6 Other Concept Development Activities -- 1.6 Phase II: Engineering Development -- 1.6.1 Typical Engineering Activities for Phased Arrays -- 1.6.2 Antenna Development -- 1.6.3 Integrated Circuit Development -- 1.6.4 T/R Module Development -- 1.6.5 Thermal Design and Heat Transfer Development -- 1.6.6 Beamformer Development -- 1.6.7 Digital Receiver/Exciter Development -- 1.6.8 Mechanical Structure Development -- 1.6.9 Production Plan Development -- 1.6.10 Acceptance Testing -- 1.6.11 Other Functions -- 1.6.12 Outputs from Engineering Development -- 1.7 Phase III: Post-Development -- 1.7.1 Production -- 1.7.2 Deployment -- 1.7.3 Operation and System

Maintenance -- 1.7.4; Eventual Decommissioning -- 1.8
; Conclusions -- 1.9; Problems -- References -- 2
Phased Array System Architectures -- 2.1; Introduction to
Phased Array System Architectures -- 2.2; Phased Array
System Basics -- 2.3; Phased Array Architectures -- 2.3.1
; Passive Phased Arrays -- 2.3.2; AESA -- 2.3.3
; AESA with Phase Shifters at Each Element and at Each
Subarray -- 2.3.4; Element-Level Digital Beamforming -- 2.3.5
; Other Methods -- 2.4; Array Architectures for T/R
Module Integration -- 2.5; Array Beamforming Options -- 2.6
; Polarization Diverse and Wideband Arrays -- 2.7;
Conclusions -- 2.8; Problems -- References -- 3 Use Cases for
Phased Arrays.

3.1; Introduction to Use Cases -- 3.2; High-Altitude
Platform Station -- 3.2.1; Introduction to HAPS -- 3.2.2
; HAPS System Description with Key Challenges and Benefits --
3.2.3; HAPS Examples and Summary -- 3.3; Medical
Applications of Phased Arrays -- 3.3.1; Introduction to Medical
Phased Arrays -- 3.3.2; Medical Arrays System Description
with Key Challenges and Benefits -- 3.3.3; Medical Phased
Array Examples and Summary -- 3.4; Phased Array for 5G
MIMO Broadband -- 3.4.1; Introduction 5G Broadband Phased
Arrays -- 3.4.2; 5G Phased Array System Description with Key
Challenges and Benefits -- 3.4.3; 5G Phased Array Examples
and Summary -- 3.5; Airborne Radar for Fighter Aircraft --
3.5.1; Introduction to Military Phased Arrays -- 3.5.2;
Airborne Phased Array System Description with Key Challenges and
Benefits -- 3.5.3; Airborne Phased Array Examples and
Summary -- 3.6; Conclusions -- 3.7; Problems --
References -- 4 Phased Array Concept Development Example -- 4.1
; Introduction -- 4.2; Needs Assessment-A Common
Starting Point -- 4.3; Technology Opportunities -- 4.4
; System Architecting -- 4.5; The SAI Method for New
System Concept Development -- 4.6; Application of the
Modified SAI Method to Broadband Access for Small to Medium-Size
Public Venues -- 4.6.1; Step 1: Determine Value Proposition
and Constraints -- 4.6.2; Step 2: Identification of Potential
Perturbations -- 4.6.3; Step 3: Identify Desired Ilities -- 4.6.4
; Step 4: Generate Function Alternatives -- 4.6.5; Step
5: Generate Architecture Options -- 4.6.6; Step 6: Select the
"Best" Architecture Option -- 4.7; Conclusions -- 4.8;
Problems -- References -- Part II Detailed Development Activities -- 5
Antenna Element Technology Options -- 5.1; Introduction --
5.2; Based Concepts of Antennas -- 5.3; Antenna
Development Process -- 5.4; Conventional Dipole -- 5.5
; Planar Inverted-F Antenna -- 5.6; Meander Line
Antenna.

5.7; Microstrip Patch Antennas -- 5.8; Bowtie Dipole
Antenna -- 5.9; Waveguide Radiators -- 5.10;
Reflector Antenna -- 5.11; Vivaldi Tapered Slotline Antenna --
5.12; Low-Profile Vivaldi Tapered Slot Antennas -- 5.13
; Tightly Coupled Dipole Array -- 5.14; Conclusions --
5.15; Problems -- References -- 6 Transmit/Receive Modules
-- 6.1; Introduction -- 6.2; Technical Challenges
Often Faced in T/R Module Development -- 6.2.1; Heat
Transfer -- 6.2.2; Signal Integrity -- 6.2.3; Integration
with Other Functions -- 6.2.4; Materials Compatibility -- 6.2.5
; Electromagnetic Coupling -- 6.3; General Description

of the T/R Module -- 6.3.1 System Location of the T/R Module -- 6.3.2 T/R Block Diagram -- 6.4 T/R Module Detailed Description -- 6.4.1 Low Noise Amplifier -- 6.4.2 Low Noise Amplifier Protection -- 6.4.3 High-Power Amplifier and Driver Amplifier -- 6.4.4 Phase Shifter -- 6.4.5 Duplexer -- 6.5 T/R Module Manufacturing and Test -- 6.5.1 Integrated Circuit Manufacturing -- 6.5.2 Package Manufacturing -- 6.5.3 Interconnects Types -- 6.5.4 T/R Module Test -- 6.6 Examples of T/R Modules -- 6.6.1 A 3-D Ceramic T/R Module for Space-Based Applications -- 6.6.2 T/R Module Using Laminate Circuit Board Technology -- 6.6.3 60-GHz CMOS T/R Module Integrated with Antennas -- 6.7 Conclusions -- 6.8 Problems -- References -- 7 Thermal Design, Heat Transfer Trade Studies, and Reliability -- 7.1 Introduction -- 7.2 Heat Transfer Fundamentals at the Integrated Circuit Level -- 7.3 Reliability and MTTF -- 7.4 Example: Millimeter-Wave SATCOM Front End -- 7.5 Array Cooling Methods -- 7.5.1 The Challenge of Phased Array Cooling -- 7.5.2 Brick Array Cooling -- 7.5.3 Tile Array Cooling -- 7.6 Other Reliability Drivers for Phased Arrays -- 7.7 Materials Used for Thermal Management -- 7.8 Conclusions -- 7.9 Problems -- References -- 8 Analog versus Digital Beamforming -- 8.1 Introduction -- 8.2 Benefits and Challenges in Analog Beamforming -- 8.3 Benefits and Challenges in Digital Beamforming -- 8.4 Basic Digital Beamforming -- 8.5 Adaptive Beamforming -- 8.6 Errors in Beamforming and Their Effects -- 8.7 Multiple Access Methods for 5G Phased Arrays -- 8.7.1 Orthogonal Frequency Division Multiple Access -- 8.7.2 Code Division Multiple Access -- 8.7.3 Other Access Technologies -- 8.8 Conclusions -- 8.9 Problems -- References -- 9 Digital Receiver Exciters -- 9.1 Introduction -- 9.2 Digital Receiver Architecture Options -- 9.3 Example Trade Study on Digital Receiver Architecture -- 9.4 Digital Exciter Architecture Options -- 9.5 Main Components of a Digital Receiver Exciter -- 9.5.1 Low Noise Amplifier -- 9.5.2 Digital Attenuator -- 9.5.3 Frequency Mixer -- 9.5.4 Preselection, Image Rejection, and Antialiasing Filters -- 9.5.5 Frequency Multipliers -- 9.5.6 ADC -- 9.6 Analysis of DRXs -- 9.7 Conclusions -- 9.8 Problems -- References -- Part III System Modeling and Advanced Development Activities -- 10 Phased Array System Modeling -- 10.1 Introduction -- 10.2 LFOV Receiver Array -- 10.3 Multichannel Communication System Design -- 10.4 Stripmap Synthetic Aperture Radar -- 10.5 Radar Detection Performance -- 10.6 Conclusions -- 10.7 Problems -- References -- Appendix 10A Excel Spreadsheet for the LFOV Array -- Appendix 10B Scilab Code for the Communication System Receiver Array -- Appendix 10C Scilab Code for the Stripmap SAR Simulation -- Appendix 10D Gaussian ROC Curve Derivation -- 11 Advanced Development Activities for Phased Arrays -- 11.1 Introduction -- 11.2 System Risk Management -- 11.3 Advanced Development Activities -- 11.4 Types of Advanced Development Risk Reduction Activities -- 11.5 Typical Risks in Phased Array Development -- 11.6 Advanced Development Impacts All Levels of the System -- 11.7 Other Risk Analysis Topics.

Sommario/riassunto

Phased arrays, while traditionally used in radar systems, are now being used or proposed for use in internet of things (IoT) networks, high-speed back haul communication, terabit-per-second satellite systems, 5G mobile networks, and mobile phones. This book considers systems engineering of phased arrays and addresses not only radar, but also these modern applications. It presents a system-level perspective and approach that is essential for the successful development of modern phased arrays. Using practical examples, this book helps solve problems often encountered by technical professionals. Thermal management challenges, antenna element design issues, and architectures solutions are explored as well as the benefits and challenges of digital beam forming. This book provides the information required to train engineers to design and develop phased arrays and contains questions at the end of each chapter that professors will find useful for instruction.
